Introduction

Identical International is the well known name in Manufacturers and Exporters all kinds of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments since 2005, based at Pakistan.

We are Manufacturers & Exporters of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments. All our Instruments are made with top quality raw material and are treated to enhance softness, durability. We guarantee for all our instruments for workmen ship and stainless steel quality at extremely competitive price with timely delivery. Our instruments can also be had with buyer's own logos or symbols. We sincerely desire to induct you in the circle of our honorable Importers, wholesalers, Retailers and Distributors of above all instruments, in the world over we are specialized in the above mentioned items.

Many years' experience in the Business of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments has taught us that quality instruments, favorable price, prompt shipments should be only part of our service: rather, "Customer Satisfaction" is always the ultimate goal we are striving for.

At **Identical International**, we have made tremendous efforts to communicate more with you. Our valued customers, to provide and exchange any up-to-date market information and price trends; to bring innovation to help you enhance your competitiveness to learn about what you need to care about what you feel? And support you with all that in our capacity. We understand that customer's growth is also our growth and your future is also our future. We call this "Partnership".

This now means that our many satisfied customers enjoy the flexible terms and condition offered when purchasing our instruments, But also the cast effective convenience of a regional office.

We look forward to further development of our ongoing successful cooperation.

Faithfully yours

Process of Instruments

Steel the quality of steel is very important in the production of quality instruments. The best you select the best you produce. In order to ensure the finest of quality steel, we have imported or best quality local steel as required by valued customers.

Forging is a process of cutting shaped raw instruments with the help of dyes and hammers. Here, the skilled hands give life to the metal and give it the rudimentary shape that will go through series of complicated processes.

Forging Inspection at this stage, forged tools are checked to ensure no piece contains any cracks or is reshaped beyond acceptable limits. Checking the quality of raw instruments for: -
a. Shape fault b. Broken

Machining in this process forging is cut or shaped by machines i.e. cutting sharp edges and raw material in the shape. Here instruments are given their shape through grinding and hammers. For this purpose, extremely skilled labor is required and this process is carried out by instrument specialists only.

Milling drilling of holes in the instruments where required for screws. Different kinds of screwing machines are used and instruments are made pairs here. Instruments with even the slightest difference in whole positions will suffer otherwise.

Inspection at this stage, all the instruments is inspected not only for machining and milling, but for every process they've been through. It's the stage where only best instruments are selected and instruments with tiny holes and manufacturing faults are again sorted out.

Filling at this stage the steel is not too hard so filling is used to shape the instruments in the exact shape they are required to be. The workers match the shape exactly with the samples provided at this stage. So the instruments get most of their shapes at this stage.

Filling Inspection after filling the inspection is made and measurements and shapes are checked according to samples.

Binding and Temper at this step the instruments are bound in groups of 12 pieces. Then they put them in temper machine, which is filled with a particular material. Here instruments are tempered and its ensured that every instrument get equal heat and treatment so a consistent quality would achieve.

Snuffing Fitting for scissors and forceps they are in two pieces so they are joined in this process with screw. Forceps (Tweezers) are joined before and their joint is leveled with a machine by burning the raw material on the joint. At the same stage, instruments are filled to eliminate welding suspensions.

Plant or Heat Treatment in this process the instruments are dipped in a material by hanging for five minutes to harden the material.

Polishing instruments is polished at this stage. Till this point at manufacturing stage, all the necessary shaping is done. Polishing makes every millimeter of instrument clear and any instrument with hidden defects are revealed could be sorted out.

Process of Instruments

Identical International Inspection 2% of each lot of instruments is checked by executives and then goes the further processing. In inspection they see each and every part and defective parts are marked with red marker and if rejected send to polishing again.

Ultrasonic cleaning in this process the instruments are dipped in two materials for cleaning the polish raw thing on it. One min. for first material and then for half min. for other material. Ultrasonic cleaning cleans any polishing material stuck and leaves the instrument crystal clear.

Lubrication all the instruments involving screws are lubricated at this step. Lubricating the instruments moveable portions facilitates the instrument movement.

Tuck checking In this process workers check the cuts and all other things just by viewing the instruments individually.

Etching putting each instrument on stamp pad and burning process to put stamp on each instrument. This stamping procedure is done through electronic etching machines that make the stamp reliable and even sustainable under high boiling temperatures when instruments are sterilized.

Cleaning and Checking instruments are cleaned and checked again one by one. Again it's the checking for operation, measurements, polish and usability. **Identical Internationalry Inspection 4 %** of the instruments is inspection by SSE Directors. Samples for inspection are taken randomly and are observed to every bit of detail. Even the slightest difference from acceptable standards could result in rejection of whole lot.

Packing in boxes each contains 100 pieces. 10 Boxes in an each Carton. Here instruments are packed with respect to sizes and types. Instruments boxes are properly labeled and stored in proper storing environment.

Labeling is put in this process.

**Plasterless articulator galetti
(white)**

II-D-30-101

high tech plasterless articulator galetti with adjustable screws at rears & front. solidly constructed of metal alloy casting. all anatomical movements possible

**Vibratory polished articulator galetti
II-D-30-102**

galetti articulator is solidly constructed of metal alloy casting. easy to use, allowing quick fixation of model. immediate adjustment of the occlusal & corrects imulation of central relation. all anatomical movements possible. vibratory polished

**Anatomical articulator (asa)
II-D-30-103**

anatomical articulator with bearing rod & incisive pin, 4 mounting plates & supporting back-pin for 45° view, opening 125°, intercondylar distance 110 mm - solidly constructed of metal alloy casting

**Universal articulator
II-D-30-104**

anatomical articulator, made of aluminum pressofusion of only

**Gnatus pro jp30 articulator
II-D-30-105**

the gnatus pro jp30 articulator offers the best performance with an excellent degree of accuracy. its functionality makes easier

**Anatomical articulator
II-D-30-106**

KEYSTONE BLACK ARTICULATOR WIRED

II-D-30-107

keystone deluxe universal type-a articulator. interchangeable, incisal pin included, lateral excursions.

KEYSTONE DELUXE MAGNET ARTICULATOR

II-D-30-108

keystone deluxe magnetic denture articulator with plates, interchangeable, incisal pin included. magnetic split casting ensures easy & exact setting, lateral excursions

PROFESSIONAL OCCUSOR ARTICULATOR

II-D-30-109

professional occlusor, vibratory polished articulator - aluminum, brass, stainless steel

Magicart-1 Articulator

II-D-30-110

lightweight, high-quality magic art articulator securely holds quadrant models, conserve materials & time! quickly & easily mount pre-cast dental models with the high quality. with

FULL DENTURE ARTICULATOR (ROUND)

II-D-30-111

full denture chrome plated articulator (3 slot round)

MODEL 'M' HI TOP STEPHAN ARTICULATOR

II-D-30-112

full denture chromium plated articulator. provides additional vertical dimension for acceptance of higher models. 49 wide at the joint & has a vertical

Chromium plated plain round
II-D-30-113

Nickle Chromium Plated Plain Round
Articulator

Universal articulator (yellow)
II-D-30-114

universal articulator opening
125° with 4 mounting plates -
condylar inlination fixed at 30°,
intercondylar distance at 110mm,
bennet angle fixed at 7°, distance
between mounting plates 85 mm.
solidly constructed of metal
alloy casting. available in assorted
colors

Foster denture articulator
II-D-30-115

this articulator is equipped with
an adjustable anterior pin stop &
posterior screw stop, and
constructed of a slightly heavier
gauge brass giving the
articulator a more solid feel.

Fork chrome plated articulator
II-D-30-116
nickle chromium plated

Hinge articulator full arch
II-D-30-117
an economical & simple chromium
plated hinge articulator for
Mounting full arch cases low

Quadrant / crowned bridge
Articulator
II-D-30-118
brass hinge crowned bridge
articulator for mounting
quadrant cases. crown & bridge

Universal articulator (blue)
II-D-30-119

universal articulator opening 125° with 4 mounting plates - condylar inclination fixed at 30°, intercondylar distance at 110mm, Bennett angle fixed at 7°, distance between mounting plates 85 mm. solidly constructed of metal alloy casting.

Foster / apex # 2 articulator
II-D-30-120

Foster / apex # 2 articulator, the width at the joint is 1-3/4" with a vertical parallel height of 2-1/8". the small size of this articulator allows the versatility to use for full or partial work. the finish is bright chrome. high back

Mortimer-i oculader articulator
II-D-30-121

plainline ball bearing mortimer-i oculader articulator. all filled with high carbon steel balls for smooth setting & articulation of denture

Mortimer-ii oculader articulator
II-D-30-122

plainline ball bearing mortimer-ii oculader articulator. all filled with high carbon steel balls. semi-adjustable articulator

Occlusor, wire articulator
II-D-30-123

occlusor, wire articulator - stainless steel & aluminum

Asa articulator 5002
II-D-30-124

asa articulator with lateral moment. made of aluminum die casting with 2 mounting plates.

Model 'A' Crescent Stephan Articulator
II-D-30-125

CRESCENT STEPHAN MODEL "A" ARTICULATOR IS USED FOR PARTIALS, CENTER SPRING WITH ADJUSTABLE TENSION, SMOOTH BRASS CASTINGS WITH NICKEL PLATING, CENTER BAR IN BOTH UPPER & LOWER BOW FOR MAXIMUM PLASTER RETENTION & STRENGTH. WIDTH AT THE JOINT OF 29, & VERTICAL SPAN WHEN BOWS ARE PARALLEL OF 2 1/8". REPRODUCE ALL ANATOMICAL MOVEMENTS. UPPER AND LOWER SECTIONS MAY BE SEPARATED OR ASSEMBLED QUICKLY. OPEN CONSTRUCTION PROVIDES FREE ACCESS TO LINGUAL SURFACES. ANATOMICAL IN EVERY RESPECT

Bite Fork / Occlusal Alignment Plane
II-D-30-126

BITE FORK IS A RELIABLE INSTRUMENT FOR CHECKING THE CORRECT POSITION OF THE MASTICATORY PLANE, ACHIEVING PARALLELISM OF THE OCCLUSAL PLANE WITH THE CAMPER'S LINE & THE BIPUPILLARY LINE IS FUNDAMENTAL TO THE CONSTRUCTION OF DENTURES
