Introduction

Identical International is the well known name in Manufacturers and Exporters all kinds of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments since 2005, based at Pakistan.

We are Manufacturers & Exporters of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments. All our Instruments are made with top quality raw material and are treated to enhance softness, durability. We guarantee for all our instruments for workmen ship and stainless steel quality at extremely competitive price with timely delivery. Our instruments can also be had with buyer's own logos or symbols. We sincerely desire to induct you in the circle of our honorable Importers, wholesalers, Retailers and Distributors of above all instruments, in the world over we are specialized in the above mentioned items.

Many years' experience in the Business of Surgical, Dental, Manicure, Veterinary, TC, Electro Instruments has taught us that quality instruments, favorable price, prompt shipments should be only part of our service: rather, "Customer Satisfaction" is always the ultimate goal we are striving for.

At **Identical International**, we have made tremendous efforts to communicate more with you. Our valued customers, to provide and exchange any up-to-date market information and price trends; to bring innovation to help you enhance your competitiveness to learn about what you need to care about what you feel? And support you with all that in our capacity. We understand that customer's growth is also our growth and your future is also our future. We call this "Partnership".

This now means that our many satisfied customers enjoy the flexible terms and condition offered when purchasing our instruments, But also the cast effective convenience of a regional office.

We look forward to further development of our ongoing successful cooperation.

Faithfully yours

Process of Instruments

Steel the quality of steel is very important in the production of quality instruments. The best you select the best you produce. In order to ensure the finest of quality steel, we have imported or best quality local steel as required by valued customers.

Forging is a process of cutting shaped raw instruments with the help of dyes and hammers. Here, the skilled hands give life to the metal and give it the rudimentary shape that will go through series of complicated processes.

Forging Inspection at this stage, forged tools are checked to ensure no piece contains any cracks or is reshaped beyond acceptable limits. Checking the quality of raw instruments for: -
a. Shape fault b. Broken

Machining in this process forging is cut or shaped by machines i.e. cutting sharp edges and raw material in the shape. Here instruments are given their shape through grinding and hammers. For this purpose, extremely skilled labor is required and this process is carried out by instrument specialists only.

Milling drilling of holes in the instruments where required for screws. Different kinds of screwing machines are used and instruments are made pairs here. Instruments with even the slightest difference in whole positions will suffer otherwise.

Inspection at this stage, all the instruments is inspected not only for machining and milling, but for every process they've been through. It's the stage where only best instruments are selected and instruments with tiny holes and manufacturing faults are again sorted out.

Filling at this stage the steel is not too hard so filling is used to shape the instruments in the exact shape they are required to be. The workers match the shape exactly with the samples provided at this stage. So the instruments get most of their shapes at this stage.

Filling Inspection after filling the inspection is made and measurements and shapes are checked according to samples.

Binding and Temper at this step the instruments are bound in groups of 12 pieces. Then they put them in temper machine, which is filled with a particular material. Here instruments are tempered and its ensured that every instrument get equal heat and treatment so a consistent quality would achieve.

Snuffing Fitting for scissors and forceps they are in two pieces so they are joined in this process with screw. Forceps (Tweezers) are joined before and their joint is leveled with a machine by burning the raw material on the joint. At the same stage, instruments are filled to eliminate welding suspensions.

Plant or Heat Treatment in this process the instruments are dipped in a material by hanging for five minutes to harden the material.

Polishing instruments is polished at this stage. Till this point at manufacturing stage, all the necessary shaping is done. Polishing makes every millimeter of instrument clear and any instrument with hidden defects are revealed could be sorted out.

Process of Instruments

Identical International Inspection 2% of each lot of instruments is checked by executives and then goes the further processing. In inspection they see each and every part and defective parts are marked with red marker and if rejected send to polishing again.

Ultrasonic cleaning in this process the instruments are dipped in two materials for cleaning the polish raw thing on it. One min. for first material and then for half min. for other material. Ultrasonic cleaning cleans any polishing material stuck and leaves the instrument crystal clear.

Lubrication all the instruments involving screws are lubricated at this step. Lubricating the instruments moveable portions facilitates the instrument movement.

Tuck checking In this process workers check the cuts and all other things just by viewing the instruments individually.

Etching putting each instrument on stamp pad and burning process to put stamp on each instrument. This stamping procedure is done through electronic etching machines that make the stamp reliable and even sustainable under high boiling temperatures when instruments are sterilized.

Cleaning and Checking instruments are cleaned and checked again one by one. Again it's the checking for operation, measurements, polish and usability. **Identical Internationalry Inspection 4 %** of the instruments is inspection by SSE Directors. Samples for inspection are taken randomly and are observed to every bit of detail. Even the slightest difference from acceptable standards could result in rejection of whole lot.

Packing in boxes each contains 100 pieces. 10 Boxes in an each Carton. Here instruments are packed with respect to sizes and types. Instruments boxes are properly labeled and stored in proper storing environment.

Labeling is put in this process.
